TRADE EXECUTION POLICY

1. The Company is committed to providing clients with fair and transparent trade execution services. This Trade Execution Policy outlines our procedures for executing trades on behalf of the Clients, including the factors considered when executing orders and the Company's commitment to best execution. This policy contains the conditions for placing and executing orders and trades on the platform. The Company will execute the orders in compliance with its User Terms of Service and the procedures herein.

2. The provisions herein cover the completion of Client orders, implementation of decisions to the Company's trading products, and fulfillment of orders on behalf of the Client. Therefore, the Company platform acts as the only execution venue for all placed orders and trades. The Client understands and accepts that trading transactions are dealt with under the Company's facilities and not with the underlying market.

3. The Company is dedicated to achieving the best possible outcome for the Clients when executing their trades. Best execution means executing trades promptly, fairly, and at the most favorable terms available under the prevailing market conditions.

4. Credentials for the trading account and platform will be sent to the Client's registered email with the Company, including the issued account number and password. These details should remain confidential to prevent unauthorized access.

5. Other than the trading platform, the Client may also submit orders by sending an email to the Company. Client orders received via email are subject to the Company's approval.

6. Orders are executed according to the Client's sequence of submission or implementation. The list of all initiated orders, including the approved, pending, and canceled, is available on the trading platform. Orders will only be accepted after completing the specifications, and the Client may contact the Company for further status confirmation.

7. Since the Company acts as a service provider of the underlying market, the prices may differ from the indicated prices before placing the order or trade. Trading transactions and price movements are dependent alone on the instrument itself and are beyond the Company's control.

8. The following factors are crucial when executing an order that affects the market prices:
- **a)** Spreads
- **b)** Price quotes
- **c)** Order size
- **d)** Liquidity
- **e)** Execution speed and interval time
- **f)** Market condition and event

9. The Client is responsible for monitoring the orders and trades in his/her account and ensuring that it complies with the Company's margin requirements. The Company can contact the Client regarding its trading activities and requirements whenever it sees fit.

TRADE EXECUTION POLICY

Xeodis PRECISION TRADING

10. Orders considered highly risky or with incomplete specifications can be denied, canceled, or delayed. The Company may also cancel or delay orders during unforeseen occurrences, including but not limited to Force Majeure Events and technical or system failure. The Client must meet the volume requirements to execute his/her orders and trades, which may be canceled entirely if volume insufficiency occurs.

11. The Company can entirely cancel trades and orders without notice if any of the following happens:

    a) Technical or system interruptions, including internet and network communication disruptions

    b) Unusual market conditions and adversities

    c) The trading platform detects an invalid trade and order or the account lacks funds

    d) The Client poses a legal threat to the Company, including being involved in unlawful activities and other suspicious trading acts

    e) The Client is deemed or proven to have violated the User Terms of Service and other contracts or agreements

12. The Client understands and accepts that canceling orders at the last minute (i.e., market pre-open and pre-close) has high-risk potential. The Client can only cancel or modify an order if it has not been executed yet. Any adjustment or cancelation can only be implemented during market hours on a business day, as indicated on the Site.

13. Traded contracts or other derivatives are closed automatically after the validity period except in cases when the Client meets the statistic requirements and if the trading account is in a legible condition, where the Client may transfer to another liquidity provider. Additionally, the Company can cancel any trade that lasted for less than 10 minutes, and its profits will be written off.

14. The Company supports various order types to accommodate the diverse trading needs of the Clients, including market orders, limit orders, stop orders, and others. Clients can choose the order type that best suits their trading strategy and objectives. The Client is responsible for completing the order specifications, including order limit, stop-loss, take-profit, and the specifications' accuracy. The Company will not bear the liability for any loss or damage that the specification inaccuracy caused.

15. A positive growing dynamic is a gap between the completed trades in profit that does not exceed the ongoing negative trades. The calculation of profit is the net of all the positive trades made after the deduction of negative trades.

16. The Company regularly monitors and reviews trade execution practices to ensure compliance with regulatory requirements and industry best practices. The Company's compliance team conducts periodic reviews to assess the effectiveness of our execution policies and procedures.

17. The Company and its liquidity providers have established maximum risk levels and limits to prevent excessive orders. Therefore, the Company will only approve and execute orders if they comply with the relevant risk management. Moreover, the cost of orders should only be within the available Bid and Ask prices, and the Company can cancel or remove any order if the relevant provider has not given its price.

TRADE EXECUTION POLICY

18. As stated in the Risk Disclosure Notice, rapid price movements cannot be guaranteed, whether they will be in favor of the Client or not. The Client understands and accepts the concept of price slippage or market gapping that may occur when trading CFDs and other leveraged products, causing a drastic price shift in an underlying asset.

19. The Company and its service affiliates can amend the Trade Execution Policy and its market conditions, including the risk levels and spreads, whenever they see fit. By using the trading platform and executing trades with the Company, the Client acknowledges and consents to the trade execution policies and procedures as outlined in this document.

TRADE EXECUTION POLICY

Trading derivatives on margin and utilizing leverage carries substantial risks, which may result in gains or losses. Prior to engaging in trading activities, it is essential to carefully evaluate your trading goals, experience level, and risk tolerance. There is a possibility of sustaining significant losses, potentially exceeding your initial investment. Therefore, it is crucial not to invest funds that you cannot afford to lose. All users are strongly advised to thoroughly read and comprehend the associated risks before participating in trading activities.
